

TESI[®] 2.0

Team Emotional & Social Intelligence

TESI 2.0 is the second edition of the popular Team Emotional and Social Intelligence Survey[®]. Give your team the opportunity for 360 feedback on the seven critical competencies for emotionally effective teamwork. When each team member rates the team's skills from his or her perspective everyone can see where the team feels it is strong as well as where it is struggling. There has never been a time when stress tolerance was more critical than it is today. With a little attention and regular practice all teams can improve their ability to manage stress, or resolve conflict, or enhance communication, or whatever they need to improve.

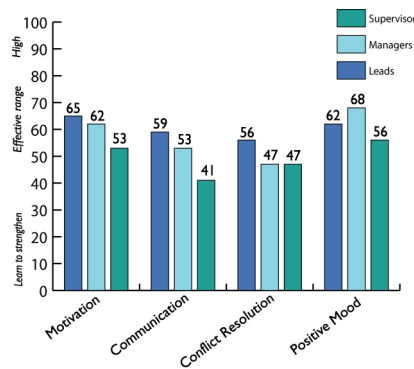

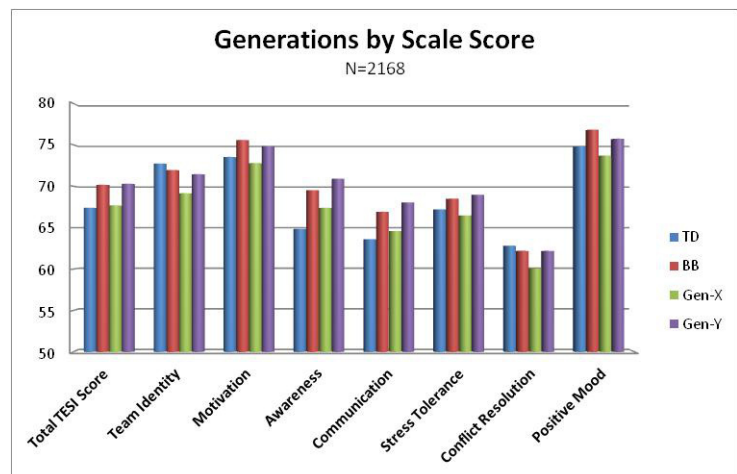

Book your team for the TESI 2.0 now!

Report Information

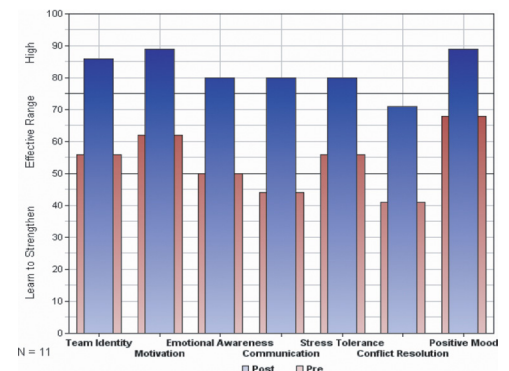

Multiple breakouts to the full TESI 2.0 report expand team awareness: a team report, coach's section which includes information on the validity indices, individual reports and demographic and comparison reports for:

- Gender
- Age
- Generation-compare scores on your team between Gen X, Millennials, and Boomers.
- Longevity
- A breakout can be customized by you to reflect unique specifics of your team—Role or Department

The BEST news is each of these scales can be improved. See the progress this team made over six months!

TESI[®] - Pre & Post

Subgroups within a team may see their team very differently. For example, this team of 29 leaders was composed of three different roles – leads, supervisors and managers. Note how differently they scored on four of TESI's seven scales.
